

**Good to know: Mirror legislation**

Older vehicles that do not possess an EU registration, require a minimum reflection area of 60cm<sup>2</sup> (just over 9in.<sup>2</sup>) on each of their mirrors. An European approval emblem is not absolutely necessary. Current scooter models are all registered according to EU legislation. The mirrors that are attached to them must have EU approval markings. Mirrors that have less than a 60cm<sup>2</sup> reflection area or no EU approval markings are not meant for (legal) road use.

The minimum number of mirrors required depends on the first year of registration

before 01.01.1990	1 right hand mirror
since 01.01.1990 max. speed under 100km/h	1 right hand mirror
since 01.01.1990 max. speed over 100km/h	a mirror each side

\*\*registered according to EU legislation\*\* are vehicles since 01.10.2005.  
Check your registration certificate for the EU entry (digit K)
